Portfolio • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience building scalable web applications and SaaS platforms using Python, Django (DRF), and React. Delivered production features including voucher systems, payment integrations (Stripe, Rapyd, Teya & Opayo), role-based access control, onboarding flows, subscription billing, and inventory management. Strong foundation in data structures, algorithms, and object-oriented design. Seeking a challenging Software Engineering role to contribute to innovative products and continue growing in a dynamic engineering environment.

TECHNICAL SKILLS

Languages: Python, C, C++

Frameworks: Django, Django REST Framework (DRF), React

Databases: PostgreSQL, MySQL

Tools & DevOps: Docker, CI/CD, GitHub Actions, Celery, Redis, Django Signals, Cron Jobs, Cloudflare, cPanel, Dokploy

Payments & Integrations: Stripe, Rapyd, Teya, Opayo, Cloudflare Turnstile

Core Concepts: Data Structures & Algorithms, OOP

PROFESSIONAL EXPERIENCE

Backend Developer (Remote) | DevsStream Ltd. | Oct 2025 – Present

- Designed and delivered core backend modules for Kaaruj (e-commerce/SaaS), including voucher engine, offer system, invoicing, corporate accounts, and gift-card functionality.
- Built scalable backend features for Nanis, integrating multi-provider payments (Rapyd & Teya), email notifications, Cloudflare Turnstile, and robust server-side validation.
- Architected authentication and authorization system (JWT + Google Sign-In), role-based access control, custom domain support, VAT handling, and subscription billing for an in-house **Restaurant Management SaaS**.
- Developed key modules for an internal **Inventory Management system**, including dashboard APIs, bulk export/import, order management, reporting, filtering, and pagination.

Full Stack Developer (Part-Time) | Janata-Wifi | Mar 2025 – Oct 2025

- Developed full-stack features for an internal SaaS platform using Django and React, focusing on clean API design and responsive UI.
- Implemented secure authentication flows and role-based access control to manage different user permissions across the platform.

PROJECTS

InvoiceFlow — Full-Stack Invoice Management System

Django, DRF, React, PostgreSQL, Stripe, Docker, Celery, CI/CD | Frontend • Backend • Live Demo

- Built complete invoice & subscription system with JWT + Google OAuth, role-based access, and Stripe payment links.
- Implemented automated email notifications, client management dashboard, and recurring billing logic.

EasyRent — Full-Stack Flat Rent Platform

Django, DRF, React, PostgreSQL, Cloudinary | Frontend • Backend • Live Demo

- Developed multi-role platform (Owner / Tenant) with JWT auth, flat listing, booking system, and advanced search/filtering.
- Designed secure booking flow with email notifications and role-based dashboards.

BlogTopia — Full-Stack Blogging Platform

Django, DRF, React, MySQL | Frontend • Backend • Live Demo

- Created blogging platform with review & rating system, favorites, and full-text search + filtering.
- Implemented JWT authentication and clean REST API for posts, comments, and user interactions.
